SUMMARY

Systems-focused IT engineer with a Computer Science degree and hands-on experience across cloud infrastructure, identity, endpoint management, and security operations. Comfortable from Tier 1/2 support through building event-driven systems on GCP with Terraform and CI/CD. Focused on shipping reliable internal tools and reducing manual work through automation.

EXPERIENCE

General Catalyst — Senior IT Analyst

07/2026 — Current

San Francisco, CA

- Continuing to own IT operations for the SF office while expanding scope into infrastructure automation, IAM ownership, and internal tooling across the firm.
- Setting automation and infrastructure strategy — driving platform direction and long-term architecture decisions rather than executing on inbound requests.
- Continuing to co-lead the Okta program with an IT Engineering Director as the identity backbone for the firm.

General Catalyst — IT Analyst

11/2023 — 07/2026

San Francisco, CA

- Ran day-to-day IT operations for the SF office solo while co-owning global processes with the internal IT team across NYC, Cambridge, and London.
- Co-led the Okta migration in H1 2026 with an IT Engineering Director — cut over 25+ SaaS apps to Okta. Configured SAML and SCIM integrations, built auth policies, and stood up the app lifecycle end-to-end.
- Led the team in help desk tickets closed in 2025 — 4,000+ tickets, not counting walk-ups or Slack requests. Onboarded 105+ SF employees across full tenure.
- Placed 2nd in GC's internal Hackathon (2026), competing against a field of senior engineers from across the firm.
- Ran KnowBe4 phishing simulation campaigns firm-wide, driving click rates below 8%.
- Own the Manager Portal — internal onboarding tool that lets managers pre-provision apps, distribution lists, and Slack channels before a new hire's start date.
- Built an automated executive data pipeline (Python, Tavily, OpenAI, BigQuery, GCS) surfacing leadership info for portfolio companies.
- Developed automations across Serval, Make, and Jamf that removed repetitive work from the team's plate.
- Managed endpoints across Jamf, Intune, and CyberArk, ensuring secure configuration and compliance.

Keep IT Simple — Desktop Engineer

08/2021 — 11/2023

Fremont, CA

Provided technical support and project delivery across multiple client organizations in fast-paced managed service environments, working closely with CIOs, security teams, and operations staff.

Western Allied Mechanical — IT Support Generalist, 150+ users

- Supported hybrid Windows/Mac environment across Office 365, networking, and AutoCAD.
- Led onboarding/offboarding via Active Directory, Microsoft 365, and Okta MFA.
- Delivered white-glove support for C-suite executives during major presentations.

Recology — *Project Management*

- Led migration of 1,000+ employees from Windows 8 to Windows 11 over three months.
- Built and maintained device images in WS1. Coordinated weekly status meetings with internal teams and vendors.

Kyocera Laser — *Threat Detection and Incident Response*

- Responded to an active ransomware attack alongside cybersecurity teams — threat containment, endpoint isolation, log analysis, and digital forensics support.

AC Transit • Heffernan • Swiftly — *Help Desk, Asset Management, Zoom Rooms*

- Tier 1/2 support across ticketing platforms (ServiceDesk, FreshService), device provisioning via Kandji and Intune, phishing threat handling via Mimecast, and executive AV/Zoom room support.

SKILLS

Cloud & Infrastructure GCP (Cloud Run, Pub/Sub, Artifact Registry, Secret Manager, GCS, BigQuery), Terraform, Docker

CI/CD & Automation GitHub Actions, Bash, Python, Node.js / Express, Serval, Make.com

Identity & Endpoint Google Workspace, M365, Okta, CyberArk, Jamf, Intune, Kandji, WS1, NinjaOne, Active Directory

Security Phishing simulations, Mimecast, Malwarebytes, incident response

IT & ITSM Zendesk, FreshService, IT Glue, ITIL 4

AI Tooling Perplexity Computer, Claude Code, Glean, Wispr Flow

EDUCATION

Georgia Institute of Technology — M.S. Computer Science (in progress)

Expected 06/2029

Western Governors University — B.S. Computer Science

10/2025

CERTIFICATIONS

- Google IT Support — Google
- Linux Essentials — Linux Professional Institute
- ITIL 4 Foundations — AXELOS (Exp 07/2026)

PROJECTS

Manager Portal Internal onboarding tool at General Catalyst. Managers pre-provision apps, distribution lists, and Slack channels before a new hire's start date. Triggers Serval workflows for SCIM-based app provisioning and group assignment across the SF office's onboarding flow.

GCP Project Factory Event-driven GCP provisioning POC. Pub/Sub triggers a Cloud Run worker that executes Terraform to standardize project creation. Multi-root Terraform layout with GCS-backed remote state.

portfolio.os Personal portfolio on Cloud Run with automated GitHub Actions CI/CD. Docker, Artifact Registry, custom domain with managed HTTPS.

Pokemon Emerald ACE Reproducible arbitrary code execution exploit via the Glitzer Popping vulnerability. Documents memory corruption and controlled execution primitives end-to-end.

ACCOMPLISHMENTS

- 2nd Place — General Catalyst Internal Hackathon, 2026
- GC Values: Serve Others Award — General Catalyst, 10/2025
- Engineer of the Year — Keep IT Simple, 12/2022
